Frutex Journey

- Frutex L.L.C was established in 1994, in Suhareka, Kosova and was set as a family business with the objective of producing and selling beverages.
- In 2006, we entered the Energy Drinks market with the brand commercially known as Golden Eagle which was well welcomed by the people and achieved great popularity. Golden Eagle spread throughout the territory of Kosova very fast and it kept spreading around the world.
- In 2010, we started producing the new brand of juice known as Relax juice, with a variety of taste which also had a great success and our innovation team are constantly working on the future brands to be alongside the consumers.
- In 2015, faced with the economic challenges of our population, we chose not to remain indifferent and founded the Golden Eagle Foundation. Through this initiative, we have built homes in Kosova, Albania, and North Macedonia, supported hospitals in Kosova with essential equipment, and provided scholarships for students, as well as assistance to individuals in urgent need.
- In 2018, we as Frutex reached a goal we had set for ourselves by installing the line for fruit processing and at the same time we had also invested in our own plantations.
- In 2020, we achieved a really high milestone which is the production of 100% Natural Juices. The line of production was implemented and the juices now are being produced with fresh fruits from our plantations and also from cooperating with local farmers.
- Art Food Industry was founded with a vision to bring authentic flavors to the market, specializing in the production of jams, ketchup, and ajvar crafted with care from high-quality ingredients.
- One of our most meaningful achievements is in the 2022 we establishment of the paper processing factory, Freesia, entirely staffed by people with different disabilities a project that is especially close to our hearts.
- 2024, we create a new brand called Zeros. Zeros is our newest line of refreshing soft drinks, crafted without sugar for a lighter and healthier choice. Designed for consumers who seek great taste without compromise, Zeros combines freshness, innovation, and balance making it the perfect drink for today's active lifestyle.
- In 2025, through the Frutex & Golden Eagle Foundation, we launched Golden Eco a campaign for waste collection and recycling. Golden Eco reflects Frutex's long-term commitment to sustainability and creating a cleaner, greener future..
- Nowadays we are one of the biggest exporters in Kosova, we as Frutex have more than 450 employees. We are exporting over 35 countries around the world and we are relentlessly working towards increasing our export capacity.

Our success is based on hard work, new technology and high quality.
